3) simultaneously 4) pejoratively

#### PART D: Reading Comprehension

**Directions:** Read the following three passages and answer the questions by choosing the best choice (1), (2), (3), or (4). Then mark the correct choice on your answer sheet.

##### PASSAGE 1:

Reputedly, the first computer game was *Spacewar*, created at MIT in 1962 by Steve Russell and his friends for their amusement. *Spacewar* was later enhanced by others and widely distributed to other users, providing a new way of inspiring graduate students to neglect their studies and play. In *Spacewar*, two players guide spaceships and fire torpedoes at each other. It was the first widely distributed example of a major type of computer game, the action or arcade game. Nolan Bushnell was one of the students elsewhere who, distracted by *Spacewar*, was inspired to try to re-implement it on a smaller and cheaper computer. While his implementation was a failure, he founded Atari in 1972 and released *Pong*, which was the first commercially successful arcade game. Atari was the major producer of arcade games in the classic period of computer games before the market crashed in the mid-1980s and was also one of the companies along with Magnavox who created the market for TV game consoles.

*Adventure*, a very different type of game, was created in 1976 by Will Crowther. Inspired by the exploration of caves in Kentucky and the role-playing board game *Dungeons and Dragons*, he developed *Adventure* for his children. Crowther's FORTRAN code was reworked significantly by Don Woods (another graduate student), who was at Stanford at the time. *Adventure* was, like *Spacewar*, distributed

freely. It was not an action or arcade game, but what we today would call a text-based “adventure” game where the user types commands to move around a fictional world solving puzzles and finding treasures. Games like *Adventure* often place the player in a Tolkien-like fantasy world where he or she has to perform a quest. *Zork*, which came out in 1981 for the Apple II, was the first commercially successful implementation of a game of this type. With multimedia and networking now available for most personal computers, the line between these two game genres has become blurred.

- 31- The underlined word “reputedly” in paragraph 1 is closest in meaning to .....
- 1) apparently
  - 2) technically
  - 3) certainly
  - 4) commercially
- 32- What does paragraph 1 mainly discuss?
- 1) The origin of the two computer game companies active in the late 20<sup>th</sup> century
  - 2) The role of academic institutes in the emergence of computer games
  - 3) The negative influences of computer games on university students
  - 4) The emergence of computer games in the 2<sup>nd</sup> half of the 20<sup>th</sup> century
- 33- Which of the following best shows the writer’s attitude to the influence multimedia and networking have exerted on game genres, mentioned in paragraph 2?
- 1) Critical
  - 2) Enthusiastic
  - 3) Impartial
  - 4) Skeptical
- 34- All of the following terms are mentioned in the passage EXCEPT .....
- 1) cheaper computer
  - 2) game design
  - 3) exploration of caves
  - 4) personal computers
- 35- Which of the following is true about the two computer game genres mentioned in the passage?
- 1) One is known as arcade games; *Dungeons and Dragons* is an example of the other.
  - 2) One is known as role-playing games; *Adventure* is an example of the other.
  - 3) One is known as action games; *Spacewar* is an example of the other.
  - 4) One is known as text-based games; *Pong* is an example of the other.
- 36- According to the passage, which of the following is true?
- 1) *Zork* was different from the game developed at the MIT and similar to the one created by Crowther in terms of its commercial nature and the genre it belonged to, respectively.
  - 2) Despite his early frustration, the original creator of *Spacewar* went on to found a computer game company, dominating the market for TV game consoles in the early 1980s.
  - 3) A player was pitted against another in *Spacewar*, a computer game of which a more advanced version was later developed by a Stanford University graduate in the late 20<sup>th</sup> century.
  - 4) Both computer game genres were represented by commercially successful games, namely *Pong* and *Adventure*, with the former appearing earlier than the latter.

### PASSAGE 2:

Not coincidentally, I think, the *Republic* is as famous for promulgating Plato’s views on censorship as it is for the concept of the philosopher-king. [1] Both are means of legislating the Good in the ideal state through the notion of *paideia*, education as

ethical and cultural experience. An indispensable part of *paideia*, in ancient Greece as well as in our own time, is the place of literature in the curriculum.

[2] Critics of Plato's theory of art have typically directed their objections to his idealist and rationalist biases. But there are also those who downplay Plato's condemnation of the purely aesthetic, in the light of his own supreme literary accomplishments and fertile imagination. For them, Plato has so internalized the notion of art that his practice counts as weightier evidence of his real views on art than does his theory. Emil Reich (1906), for example, insists that Plato's dialogues—which are “absolute art ... in prose, what the Parthenon is in stone”—must be taken as incontrovertible proof of what he must have felt about art. [3] With Plato the true meaning of any statement must be deduced through “the innuendos of his thought,” through what he does not say as much as through what he says. While Reich is correct in acknowledging the importance of the dramatic context of Plato's writing, the attempt to rescue Plato from his own pronouncements fails to whitewash the banishment, which occurs at the end of a thoroughly worked-out argument against poetry.

The context of Plato's banishment of the poets is the paideutic one, in which art cannot be evaluated apart from either its social and cultural or its intrinsically didactic function. By definition, the poem, composed of words that point to the world, teaches as well as delights. Hence there is in literary art a close resemblance to propositional knowledge, which, when combined with the power of poetic charm, influences the mind of the percipient, for good or for ill. [4] In this context, the enjoyment of a work of art can be regarded as a moral issue; indeed it was so to the early Greeks.

**37- According to paragraph 1, which of the following is NOT true?**

- 1) Plato drew on his experience as a philosopher-king to write against censorship.
- 2) Plato referred to the concept of censorship in his work called the *Republic*.
- 3) The concept known as *paideia* emphasizes the moral aspect of education.
- 4) The *Republic* does in a way address the role of literature in the society.

**38- The underlined word “their” in paragraph 2 refers to .....**

- |                            |            |
|----------------------------|------------|
| 1) philosophers like Plato | 2) biases  |
| 3) objections              | 4) critics |

**39- The underlined word “innuendos” in paragraph 2 is closest in meaning to .....**

- |                 |                  |
|-----------------|------------------|
| 1) frameworks   | 2) preconditions |
| 3) implications | 4) complexities  |

**40- Why does Reich mention “Parthenon” in paragraph 2?**

- 1) To undermine Plato's purely aesthetic sensibility
- 2) To further illustrate a point in a more tangible manner
- 3) To demonstrate the influence of Greek art on Plato's philosophy
- 4) To prove the artistic quality of the Parthenon as a Greek monument

**41- According to the passage, which of the following is NOT true?**

- 1) The author of the passage contends that Reich's attempts to rescue Plato from his own declarations ultimately fail to justify the expulsion of poets mentioned in the *Republic*.
- 2) There exists in literary art a strong affinity with propositional knowledge, which when joined with the potency of poetic expression, becomes all the more influential.
- 3) *Paideia* is fundamentally a didactic literary notion, as delineated within Platonic philosophy and referenced in his seminal work, the *Republic*.
- 4) For Plato, art must be evaluated in conjunction with its socio-cultural context and its pedagogical purpose, rather than in isolation.

- 42- The passage provides sufficient information to answer which of the following questions?  
**I. Did Plato's diatribe against poets bring about any change in the socio-political system at the time?**  
**II. In which decade was Emil Reich born?**  
**III. Does Plato consider poetry to be detached from the realm of the external world?**  
 1) Only I  
 2) Only III  
 3) I and II  
 4) II and III
- 43- In which position marked by [1], [2], [3] or [4], can the following sentence best be inserted in the passage?  
**Because of his censure and banishment of the poets in Book X of the *Republic*, Plato has been under attack for over twenty centuries as the father of censorship, the enemy of art, and the architect of didacticism in literature.**  
 1) [1]  
 2) [2]  
 3) [3]  
 4) [4]

**PASSAGE 3:**

Holidaymaking is not a leveling force. [1] As Arthur Hope contended in 1912 in relation to leisure more generally, it does not render everyone equal but, instead, reflects and sometimes even exacerbates "those social divisions and systematic inequalities inherent in the organization of contemporary capitalism." Class is clearly an important source of explanation for such differences, and will rightly feature in any analysis of tourism, past or present. It offers a sounder starting-point for exploration than a belief that the user has an unrestrained choice in terms of leisure consumption. The fact is that individuals are social beings, located within a particular structural context that will affect both their material potential to engage in leisure and also their perception of what is possible. Categorically, assert Clarke and Critcher (1985), "leisure can usefully be understood in terms of class."

Other writers have supported this view (Tomlinson 1981). [2] Particularly, in the context of its growing commercialization, Eisenschitz (1988) for instance sees leisure as contributing to the physical reproduction of the labor force, and having "an ideological significance in reproducing the class relations within which this occurs." As an important source of consumption in capitalist societies—with its products bought and sold in the open market, and with the compliance and support of State policy—a related concept to explain the function of leisure and tourism is that of commodification. The term is used by Kirby (1985) "to underline the fact that leisure is not an innocent activity stripped of social meaning, but is a multilayered phenomenon, involving exchange values, the circulation of capital and the necessary intervention of the state."

Yet few would assert that class alone can provide a total explanation of what subsequently takes place. [3] Over time and in different places, patterns of tourism will vary in response to specific needs and traditions. Classic writers in this field explored the importance of this cultural context in relation to working-class leisure activity. Departing from convention (whereby popular culture had been conceived as a necessarily inferior form of activity as compared with the "high culture" of society's elite), the new "culturalists" pointed to a set of values and activities in their own right.

**Linguistics**

- 51- In the syntactic analysis of “The little orange car sped”, the process of ..... is evident.
- 1) backtracking
  - 2) semantic bootstrapping
  - 3) tautology
  - 4) negative polarity item
- 52- Which statement is FALSE regarding prescriptive grammar?
- 1) The Greek Alexandrians in the first century and the Arabic scholars in Basra in the eighth century held this view.
  - 2) Writing follows certain prescriptive rules of grammar, usage, and style that the spoken language does not, and is subject to little, if any, dialectal variation.
  - 3) In a society where “linguistic profiling” is used to discriminate against speakers of a minority dialect, it may behoove those speakers to learn the prestige dialect.
  - 4) Long before the Renaissance, a new working class emerged who wanted their children to speak the dialect of the “upper” classes. This desire led to the publication of many prescriptive grammars.
- 53- The two main concerns of computational semantics include .....
- 1) speech understanding and speech generation
  - 2) speech description and speech production
  - 3) speech detection and speech recognition
  - 4) speech parsing and speech analysis
- 54- The process of coarticulation leads to the important processes of ..... and ..... which both develop .....
- 1) nasalization, assimilation, regular speech
  - 2) assimilation, elision, normal speech
  - 3) elision, nasalization, normal speech
  - 4) deletion, nasalization, regular speech
- 55- Which statement is TRUE about ASL?
- 1) The signs in ASL have their meanings within the system of signs, through reference to some pictorial image each time they are used.
  - 2) It has become clear that any feature that is characteristically found in spoken languages does not have a counterpart in ASL.
  - 3) ASL is a natural language that is quite remarkable for its endurance in the face of decades of prejudice and misunderstanding.
  - 4) Most everyday use of ASL signs by fluent ASL users is based on identifying symbolic pictures.
- 56- Caregiver speech is defined as .....
- 1) speech addressed to young children by the family member(s) or older children who are looking after them
  - 2) speech addressed to young children by the adult(s) or older children who are looking after them
  - 3) speech addressed to young children by the mother or other adults who are looking after them
  - 4) speech addressed to young children by the adult(s) or parents who are looking after them

- 75- Which statement is FALSE concerning stereotyping and attitudes in language learning and culture?
- 1) It is implausible to assert that second language learners benefit from positive attitudes and that negative attitudes may lead to decreased motivation.
  - 2) Stereotypes can assist EFL students to have a joyful learning practice which can lead to a higher level of motivation.
  - 3) It is unclear whether attitudes develop early in childhood and are the result of parents' and peers' attitudes.
  - 4) Stereotyping usually implies a type of attitude toward the culture or language in question.
- 76- Based on ....., it can be mentioned that it is exceedingly difficult to predict SLA a priori.
- 1) restructuring theory
  - 2) output hypothesis
  - 3) input hypothesis
  - 4) chaos theory
- 77- Which of the following is NOT an approach to content-based instruction at the university level according to Richards and Rogers?
- 1) Topic-based language instruction
  - 2) Sheltered-content instruction
  - 3) The Team-teach approach
  - 4) The Skills-based approach
- 78- In Gagne's model of types of learning, signal learning is an equivalent of .....
- 1) operant conditioned response of Skinner
  - 2) classical conditioned response of Pavlov
  - 3) empowerment in Roger's theory
  - 4) subsumed items in Ausubel's theory
- 79- Which statement describes the "Markedness Differential Hypothesis" most accurately?
- 1) The relative degrees of similarity based on structural grammar
  - 2) The relative degrees of similarity based on prescriptive grammar
  - 3) The relative degrees of difficulty based on descriptive grammar
  - 4) The relative degrees of difficulty based on universal grammar
- 80- Which of the following is NOT a factor that has influenced language teaching trends in the past and can be expected to continue to do so in the future according to Richards and Rogers?
- 1) Crossover educational innovations
  - 2) Crossovers from the teaching discipline
  - 3) Learner-based innovations
  - 4) Government policy directives
- 81- All the mentioned scholars were prominent scholars in the reform movement of language teaching EXCEPT .....
- 1) Prendergast
  - 2) Wilkins
  - 3) Marcel
  - 4) Guoin
- 82- Which item is FALSE regarding the "negotiated syllabus" in language teaching?
- 1) Breen and Littlejohn (2000) call this procedural negotiation: "Procedural negotiation in the language classroom comprises overt and shared decision-making".
  - 2) It has itself shifted from a thing—a type of syllabus—to an educational process—a negotiation in which teacher and learners share decision making in the classroom.
  - 3) It grew out of the task-based syllabus, in the sense that it is through processes of negotiation in interaction with others that one uses and acquires language.
  - 4) It contrasts with process-based syllabuses, which focus on the knowledge and skills that are the outcome of learning.

- 83- In ....., parallel to the processes of first language learning, the foreign language learner should first internalize a cognitive map of the target language through listening exercises.
- 1) Suggestopedia  
2) The Silent way  
3) Total Physical Response  
4) Situational Language Teaching
- 84- According to Kachru, the ..... includes countries where English has had a long history of use and where local L2 varieties have developed and become codified through extensive use.
- 1) the expanding circle  
2) the external circle  
3) the outer circle  
4) the inner circle

### Language Testing

- 85- Ideal items in an NRT development project have an average IF of ..... and the ..... available ID.
- 1) 0.50, highest  
2) 0.60, relatively highest  
3) 0.50, lowest  
4) 0.60, relatively lowest
- 86- The first concern in analyzing ..... item quality is with the ..... of each item. A second consideration is whether the ..... of each item adequately assesses the desired .....
- 1) NRT, content, form, content  
2) CRT, content, form, content  
3) CRT, form, content, content  
4) NRT, form, content, content
- 87- ..... scales of concern to language teachers include things like the students' ages, the number of years of schooling that they have had, their years of language study, the number of languages they speak, and so forth.
- 1) Ratio  
2) Ordinal  
3) Interval  
4) Nominal
- 88- The statistical significance of a correlation coefficient is useful to know because the tester can then argue that an observed coefficient probably did not occur by chance, but statistical significance does not imply that the coefficient is "significant" in the sense of .....
- 1) "absolute"  
2) "effective"  
3) "determined"  
4) "meaningful"
- 89- ..... is the systematic collection and analysis of all relevant information necessary to promote the improvement of the curriculum and analyze its effectiveness within the context of the particular institution.
- 1) Testing  
2) Evaluation  
3) Assessment  
4) Measurement
- 90- Selecting those test questions that work well at spreading out the students (for NRTs) or that are efficient at measuring the learning of the objectives (for CRTs) in the particular program is one step in ..... a test.
- 1) developing  
2) adopting  
3) adapting  
4) piloting
- 91- Which of the following is NOT a social factor in functional testing?
- 1) Social relation  
2) Social setting  
3) Social status  
4) Social fit
- 92- Which of the following is NOT a common method of scoring a cloze test?
- 1) EWM  
2) AWM  
3) ARM  
4) WRM

- 93- According to Mehrens and Lehmann (1973), teacher-made achievement tests and standardized achievement tests can be different in terms of all of the following characteristics EXCEPT .....
- 1) norms
  - 2) formats
  - 3) construction
  - 4) sampling of content
- 94- Which statement is FALSE regarding the potential problems of z scores?
- 1) Z scores are relatively small, usually ranging from about -5.00 through 0.00 to +5.00.
  - 2) Z scores are difficult to understand without a long and involved explanation.
  - 3) Z scores usually turn out to include several decimal places.
  - 4) Z scores can turn out to be both positive or negative.
- 95- Which statement is TRUE about the test reliability of NRT?
- 1) Reliability coefficients, or estimates as they are also called, can be interpreted as the percent of systematic, or consistent, or reliable variance in the scores on a test.
  - 2) The reliability coefficient is different from a correlation coefficient in that it can only go as low as 0 because a test cannot logically have less than no reliability.
  - 3) Language testers use two basic strategies to estimate the reliability of most tests: the test-retest and equivalent-forms.
  - 4) In general, the test reliability is defined as the extent to which the results can be considered consistent or stable.
- 96- According to Brown, there are various types of measurement errors. All of the following are measurement error types EXCEPT .....
- 1) variance due to curricular restraints
  - 2) variance attributable to the test and test items
  - 3) variance due to the environment
  - 4) variance due to administration procedures
- 97- The ..... is usually symbolized as either the Greek letter  $\rho$  or as the same letter spelled out as rho.
- 1) Point-biserial Correlation Coefficient
  - 2) Spearman coefficient
  - 3) Kendall correlation
  - 4) Pearson r
- 98- The goal of ..... is to provide a clear enough description so that any trained item writer using them will be able to generate items very similar to those written by any other item writer.
- 1) stimulus attributes
  - 2) response attributes
  - 3) item specifications
  - 4) specification supplements
- 99- In testing writing, ..... consists of a written model of some type with directions for conversions or specific language manipulations in rewriting the model.
- 1) transformed writing
  - 2) guided writing
  - 3) controlled writing
  - 4) reduced writing
- 100- Distorted messages and dictation are proper techniques to test ..... proficiency.
- 1) vocabulary
  - 2) listening
  - 3) speaking
  - 4) writing

- 109- “Author: Work” match in all the following EXCEPT .....
- 1) W. K. Wimsatt: *The Verbal Icon*
  - 2) Rene Wellek: *Seven Types of Ambiguity*
  - 3) I. A. Richards: *Principles of Literary Criticism*
  - 4) John Crowe Ransom: *The New Criticism*
- 110- The following commentary illustrates the theoretical perspective of .....  
**The emergence of new media facilitates not only the limitless and exact reproduction of artistic objects but is also intentionally crafted for the creation of numerous copies. This approach to art, by disregarding the uniqueness of the artwork as a mere object of contemplation, enables a transformative function for art pieces, paving the way for the formulation of revolutionary demands within the politics of art.**
- 1) Walter Benjamin
  - 2) Louis Althusser
  - 3) Pierre Macherey

- 1) In text-to-sign interpreting, it may be seen as short consecutive interpreting.
  - 2) When practiced in real time for immediate use by an audience, it can be labeled as sight interpreting.
  - 3) It is a special type of simultaneous interpreting.
  - 4) The interpreter's target-text production is simultaneous with the delivery of the source text.
- 164- The view of the interpreter as an invisible translating machine is rooted in ..... and associated with the .....**
- 1) asylum setting, mediating model of interpreting
  - 2) diplomatic interpreting, liaison model of interpreting
  - 3) court interpreting, conduit model of interpreting
  - 4) healthcare interpreting, advocacy model of interpreting

- 165- Kurs (1992) questions the effectiveness of shadowing in simultaneous interpreter training because it .....**
- 1) lacks active analysis of speech input
  - 2) requires less processing for comprehension
  - 3) focuses on the product rather than the process
  - 4) is not effective as a content-processing strategy
- 166- Some researchers have taken issue with the term “post-editing” to refer to user adjustments made to the machine translation (MT) output because .....**
- 1) MT output editing is solely interactive now and does not happen “after” output production
  - 2) editing of MT output in certain environments occurs simultaneously with the act of translation
  - 3) an important phase of revision, known as pre-editing, occurs prior to the output
  - 4) the term “editing” is too narrow, and “revising” would be more accurate
- 167- General artificial intelligence (AI) is a type of AI that .....**
- 1) exceeds the intelligence of human beings
  - 2) has self-awareness and can plan for the future
  - 3) has limited performance in domain-specific tasks
  - 4) comprises a series of domain-specific AI systems
- 168- Which of the following is true about neural machine translation (NMT) systems?**
- 1) In contrast to statistical machine translation systems, NMT systems are trained on huge corpora.
  - 2) NMT systems have translation consistency above sentence level.
  - 3) Current NMT systems recognize metaphors and idioms in the text.
  - 4) NMT systems do not rely on probabilistic computational models.
- 169- Which statement is NOT true about machine translation?**
- 1) Using machine translation for assimilation requires that the user understand the risks involved and even take measures to mitigate them.
  - 2) Neural machine translation typically outperforms statistical machine translation in most language pairs.
  - 3) “Knowledge bottlenecks” are generally considered a downside of rule-based machine translation systems.
  - 4) Data-driven machine translation is an application of machine learning.
- 170- Which of the following would NOT be normally included in pre-editing guidelines?**
- 1) Do not use abbreviations that are not commonly used.
  - 2) Do not use synonyms for words, and stick to one variation.
  - 3) Do not include detailed explanation and technical elaboration.
  - 4) Do not choose words that do not match the register of the text.
- 171- Which of the following is NOT a component of statistical machine translation systems?**
- |                   |                         |
|-------------------|-------------------------|
| 1) Phrase table   | 2) Translation model    |
| 3) Language model | 4) Representation model |
- 172- Which of the following is an accurate definition of a “translation unit” in a translation memory?**
- 1) A target-language phrase corresponding to the source-language unit
  - 2) A source-language segment aligned with a target-language segment
  - 3) The smallest meaningful segment in the target-language text
  - 4) The smallest meaningful segment in the source-language text

- 173- In the context of neural machine translation, which term do computer scientists typically use to describe the process of producing an output in the target language?
- 1) Decoding
  - 2) Parsing
  - 3) Rendering
  - 4) Synthesizing
- 174- Which of the following is NOT true about pre-editing for machine translation (MT)?
- 1) Pre-editing is more crucial for informative texts than appellative texts.
  - 2) Pre-editing is most useful for rule-based systems.
  - 3) Writing names in the target language can help with neural MT output quality.
  - 4) Pre-editing can be detrimental to the quality of neural MT output.
- 175- In the context of post-editing research, what is the primary trade-off between concurrent think-aloud protocols and retrospective verbal reports?
- 1) Quantitative data vs. qualitative insights
  - 2) Task interference vs. memory limitations
  - 3) Speed vs. detail
  - 4) Accuracy vs. comprehensiveness
- 176- The maximum duration of a subtitle on screen is ..... and a minimum gap between closely consecutive subtitles, regardless of frame rate, is .....
- 1) 8 seconds, 2 frames
  - 2) 6 seconds, 4 frames
  - 3) 8 seconds, 4 frames
  - 4) 6 seconds, 2 frames
- 177- Why do traditional classifications of cultural references fall short of aiding subtitlers?
- 1) They overlap too much, making it difficult to categorize terms accurately.
  - 2) They offer a limited scope, ignoring the impact of intertextual relationships on the audience.
  - 3) They are too focused on the cultural origins of terms without considering their translatability.
  - 4) They provide a comprehensive overview but fail to guide the subtitler in identifying translation problems.
- 178- Which of the following modes do film credits correspond to?
- 1) Visual-verbal
  - 2) Visual-nonverbal
  - 3) Aural-verbal
  - 4) Aural-nonverbal
- 179- Which of the following statements about the maximum number of lines and the position of subtitles on the screen is NOT correct?
- 1) Generally, interlingual subtitling is limited to a maximum of two lines, which occupy no more than two twelfths of the screen image.
  - 2) Subtitles can be moved from the bottom of the screen to another position if the background at the bottom is too light or important action is taking place in that area.
  - 3) One-line subtitles should be written on the first line, leaving the bottom line available.
  - 4) The safe area for subtitles is usually within 10% of each frame edge, allowing for a margin to ensure legibility.
- 180- Research into intersemiotic cohesion in multimodal texts has been drawing on .....
- 1) Halliday's social semiotic theory of language
  - 2) Jakobson's triad categorization of translation
